

GRUNDTVIG partnership Project that will be develop during 2 years, were are involve 6 partner and we will organize 6 meetings in some of the partner countries, this mobilities will take 3 working days and we will be planned once per every 4-6 month, with the preparation and the planning in between. All the partners of the project, while performing different tasks in the areas of origin, share a common geographical rural location and/or mountainous areas, the difficulties of communication in the areas of membership and the high rate of unemployment. Each of the partners in the specific activities in the territory, contributes to achieving the objectives of the project, to enrich with its own peculiarities and other partners, to strengthen, with strong roots, the awareness of common European citizenship.

Our motivation is to develop new pathway in agriculture fields, for a new and more attractive adult education, to develop general personal skills for disadvantages people, social inclusion by integrative courses in farming /gardening/ re-discover the "slow life", learning language and "working life" by a "protected learning and inclusion" atmosphere in the country side, in a village atmosphere.

**THE PROJECT
WAS APPROVED**

**GREEN JOB TO COLOUR
YOUR LIFE FIGHT
AGAINST UNEMPLOYMENT**

We aim to share and use their experiences and compare different approaches by: Facilitate the development and dissemination of innovative practices in adult education, including their dissemination from one participating country to the other, exploring training and education projects on agriculture field, employability, inclusion, collecting good practices and learning from these examples, and to create a website with good European practices in agriculture, providing informal and non formal education and training to young adult learners throughout all the partners countries.

We will share and discuss at European level experiences and methods, that can be used in the agriculture field. We want also bring use the methodology of "learning by doing" in agriculture field, and share the old not written experiences from each country partners.

OBJECTIVES:

- to increase awareness on the needs of informal education and the good practices in the agriculture field;
- to stimulate an environmental awareness through rural work;
- To identify new skills needed on labour market
- To find out new opportunities for green jobs:
- to intensify the cooperation and networking among institutions involved in adult education in the partner countries;
- to facilitate the use of ICT;
- to contribute to creating opportunities for the unemployed people for their employability and re-integration in the society.

Subjects to be addressed:

- * young adults to develop skills and competencies using non formal and informal education, learning by doing workshops
- * young adults outside the labour market
